PROJECTS

NeedleJunkeeZ - <https://needlejunkeeZ.herokuapp.com/>

A music based social media site geared towards record collectors and audiophiles! Users can create a profile, search for albums to add to their favorites, add friends and see their music, and even get links to buy the album! This is V1 that we the developers intend to make additions and improvements. This application is built using the following programs; React, Node, Express, MongoDB, GraphQL, and Apollo. Connected the following API's; Spotify, Discogs, and Stripe.

aquaDown - <https://aquadown.herokuapp.com/>

A plant care application that helps users take care of their plants by providing them with accurate and timely information about watering and sun exposure. To accomplish this users create a profile, search for plants, and add them to the library of plants and associated data.. View the profile to get a list of plants and their data. This app showcases my back-end skill set. It uses the programs; NodeJS, Sequelize, MySQL, JavaScript, and Express.
